About me

I am a beginner web developer from the city of Dnipro. In 2017, I graduated from the Oles Honchar Dnipro National University (Faculty of Ukrainian and Foreign Philology and Art Studies) with a Specialist's degree in Philology. Romance languages and literatures (French). Worked as a freelance copywriter and translator. In 2021, I started studying web development and fell in love with this field.

I am creative, reliable and a team player. I can express my ideas clearly and be part of a team discussion. I am also good at working alone and making decisions.

In my projects, I use the pure JavaScript (and JQuery) and CSS (SCSS) and BEM naming methodology for better performance and services the project. Also, I use some technic for better responsive design - mixins, adaptive values, adaptive fonts, browsers prefixes. I build my project with the Gulp NPM module. Also, I optimize images, use modern practice for web development (Flex Box module, GRID CSS), I have a knowledge of Bootstrap 5 CSS Framework and can use it for simple interfaces.

My Education

Oles Honchar National University, Dnipro – Specialist

September 2012 – July 2017

Faculty of Ukrainian and Foreign Philology and Art Studies.

Romance languages and literatures (French)
